

Sprint by Genius®

.....*Sprint* UV1

UV1

The Genius Sprint UV1 is a high-performance upright vacuum built for commercial use, ideal for meeting the rigorous demands of professional cleaning settings. Engineered for durability, efficiency, and user comfort, it provides outstanding cleaning results across expansive carpeted areas and a variety of floor surfaces.

Features & Benefits

Professional performance, smart design

At the core of the Sprint UV1 is a sophisticated dual-motor system. One motor drives the brush roller, while the other delivers strong suction power. This combination enhances cleaning efficiency by loosening carpet fibres as it simultaneously removes embedded dirt, dust, and debris from deep within the pile.

UV1 Specifications

Weight	7.59kg
Working width – vacuum	300mm
Working width – brush	270mm
Working capacity (approx)	480m ² /h
Bag capacity	4.5L
Brush rotation speed	5000rpm
Voltage	230–240V
Input power	880W
Suction motor	700W
Brush motor	180W
Power cord length	12.5m
3M Filtrete exhaust micro-filter	Standard
Noise level	71db
Electronic overload control	Standard
On board tools	Standard
Dimensions	300 X 325 X 1180mm

*Dimensions L | W | H

The result is a more thorough, consistent clean, even in the most demanding commercial environments.

Built for comfort and ease of use

The Sprint UV1 is thoughtfully designed with the operator in mind. Its patented weight distribution system keeps the handle feeling remarkably light, making the vacuum easy to guide and control.

Enhanced filtration for healthier air

The Sprint UV1 is equipped with a multi-stage filtration system that effectively captures fine dust and airborne particles. A high-efficiency micro-filter, combined with multiple filtration layers, ensures cleaner exhaust air and helps maintain better indoor air quality.

Perfect for offices, hotels, schools, healthcare facilities, and other high-traffic settings.

Included equipment:

- Crevice tool
- Upholstery tool
- Stretch hose
- Telescopic wand
